Subject: common core in pa

Message:

I am very concerned about the new education standards planning to be implemented in PA. We have seen the bad of common core in some off the wall teaching methods that are seriously endangering our children's capabilities to function in the workforce after school, including asking students in elementary schools to "rewrite " the bill of rights! These kids are taught NOTHING about how the constitution works and are being asked to change it? Then there is the school that changed the second amendment in its textbooks after implementing this new program. How about kids being suspended and arrested for pointing "fingerguns" at each other during recess? This is obviously not something we want our kids to be taught. Certainly not forcing them to wear muslim burkas covering all but the eyes of the women to somehow teach kids the good in islam. That is a decision for the parents and the child to make not the school. I am very concerned about common core and I believe we need to reject it.
