Subject: Common Core

Message:

Dear Mr. Sumner: I am a 78 year old former teacher and grandmother of two. Please know that many of us parents and grandparents are NOT pleased with any plans to implement Common Core in Pennsylvania. To my mind...and the minds of others...Common Core is the further relinquishing of local/state control of our education system to the federal government. The CC standards are being incorrectly hailed by certain elements of our society and government. In my lifetime, I have watched this process develop through the likes of No Child Left Behind, Race to the Top, and, now, Common Core. It cannot be a good thing to take control of education away from local, school-board-elected officials and give it to distant beaurocrats who do not have the heart-felt interest in our children. Please strongly consider ridding our state of Common Core Standards. Thank ;you. Gayle Cranford
