**Message:**

Dear Mr. Sumner, I have many concerns about the PA Core Standards. These sweeping changes to our educational system have come abruptly and without consideration of our school districts already being financially strapped. More tax increases, please, when the state and federal governments demand 99% of our income and there still isn't enough money to fund all these ridiculous programs, then what?? A new program without research to prove its value to our community is a NO GO! Please stop this unfunded regulation.
