Subject: common-core

Message:

Please put a stop to common core standards being implemented. First no one knows what the cost will be to implement and test this curriculum. School are being shutdown and the remaining schools are already drowning with budget issues. I feel common core will only amplify these problems. Secondly the pressure and stress from all the added testing will only hold back students. I feel that adding more testing takes away from the time that students should be educated in the classroom. Instead of being taught skills in the classrooms students will walk away feeling defeated. This program is being forced on school districts without proper testing, using our children as guinea pigs that could hold them back from years of proper education. Please stop the implementation of common core
