**Subject:** Stop PA Common Core

**Message:**

I am of the opinion that the Common Core Standards for education of our children is not in the best interest for the future of kids. After reading and researching this at both Federal and State levels, I come away with the sense this is a lowering of standards. I know kids can achieve at higher levels. In addition, I think this should be stopped until such standards can be tested and the State of PA tells the taxpayers exactly how they plan to pay for this mess. Thank You.
