Subject: Pa Core Standards

Message:

Dear Members and Staff, I am a parent of 3 children and have found the new system to be repetitive, and hence boring, for my children, lacking in any evident benefit, and devoid of fundamental lessons that my children need to be learning at different stages in their education. Teachers are now asking parents to supplement their education at home as the children don't have time to learn fundamentals during school time while they are preparing for regular exams. Monetary concerns aside, I worry about the quality of this education under this system. Please vote to opt out of Core Standards.
