I am writing to register my opposition to IRRC Number 2976. The Commonwealth should not cede any more authority that it already has to the federal government. States are fully capable of setting worthy goals for education. Education standards have been on a downhill slide SINCE the federal government has inserted itself. In addition, we are in an especially tight financial situation. We do not need to spend this money in this way. And finally, I am irked that this agenda is being pushed through at such a rapid pace. Much, much more public notice needs to take place. Shame on you. No wonder I don't trust you with the education of my children.
