Subject: ITEM #2976 - CHANGES TO CHAPTER 4 OF THE EDUCATION REGULATIONS

Please register my individual complaint and my family's complaint against ANY Federal involvement in the education system of our Commonwealth. As a resident of Pennsylvania and a mother of two children, I take seriously the Constitution's limited express powers granted to the Federal Government. Since the inception of the Federal Department of Education we have seen the education system in a steady decline in grades, comprehension and basic understanding even though every year has seen an increase of federal money and regulations every year with the past six years gaining in regulations and federal government intrusion into all aspects of our educational system.

Please know that I completely object to ANY Federal involvement in the education system of Pennsylvania.
