**Subject:** RE: Education National Standards

2012 NOV -5 PM 1: 50

**Importance:** High

Please register my and my family's complaint against any Federal involvement in the education system of our Commonwealth. I take seriously the Constitution's limited express powers granted to the Federal Government. Unless and until the US Constitution is amended to allow for the regulation of or direct expenditure of federal tax dollars on education, the Tenth Amendment requires that such powers are reserved to the States (and which duty is expressly set forth in the Pennsylvania Constitution).

We, the citizens of Pennsylvania, are engaged and paying attention to what happens in Harrisburg (as well as nationally). Did you not see or hear of the Mitt Romney rally in Bucks County yesterday, Sunday 11-4, of approximately 30,000 people? We will vote out the current President in Pennsylvania tomorrow as we flock to the polls to cast our vote and we will not go back to sleep politically in my lifetime.

Complying with or accepting dollars from any Federal educational program is an unconstitutional transfer of sovereignty from our State to the Federal Government.
