Subject: Chapter 4 Education Regulations: 1 object

2012 NOV -5 PM 4:35

On behalf of myself and my family, I strongly object to any Federal involvement in the education system of the PA Commonwealth. As a resident of Pennsylvania and an American, I take seriously the US Constitution's limited express powers granted to the Federal Government. The PA Constitution expressly sets forth the Commonwealth's requirements for the education of our children. To comply with or accept dollars from any Federal educational program is an unconstitutional transfer of sovereignty from our State to the Federal Government. I object to what is being asked of the state by the federal government as it relates to the implementation of national standards.

It is time that the states reclaim their rights and we should begin with the education of our children. No matter how much money the state receives from the federal government, it is never to cover the full cost of what they are expecting to be implemented. Any financial need is always borne by the tax payer. We are taxed enough and it is time to stop the spending.

Local control is always the best.

Sincerely,

Mary Christine Whipple
