Subject: Approve Chapter 78 and 78a Revisions

Dear Independent Regulatory Review Commission Members,

For over three years, the Pennsylvania Department of Environmental Protection has been working to modernize our state's regulations for oil and gas drilling operations under Chapter 78 and Chapter 78a. Those three years included an extensive public comment period with unprecedented levels of public participation and multiple opportunities for input from industry and legislators. The final revisions, which took these comments into consideration, are an important step towards bringing our state's oil and gas industry in line with modern technologies and practices that protect public health and the environment.

Pennsylvania cannot wait any longer for these revisions to take effect. Please protect Pennsylvania's health and environment by voting to approve the revisions to Chapter 78 and 78a.

Thank you.

Subject: Regulation #7-484, Environmental Performance Standards at Oil and Gas Well Sites

Dear Independent Regulatory Review Commission Members:

For too long, oil and gas operators in Pennsylvania have conducted their activities under outdated regulations and with virtual impunity—factors that have helped spur ever-growing impacts on water, air, and health.

The final draft Chapter 78 and 78a regulations from the Department of Environmental Protection (DEP) represent a significant step forward in aligning the state's oil and gas regulations with new technologies and modern-day practices. Today, both conventional and unconventional operations rely on hydraulic fracturing (fracking), use toxic chemicals and large volumes of water, disturb land, and generate polluting waste.

Both Chapter 78 and Chapter 78a are the result of over three years of public hearings, comment periods, and revisions—during which legislators and the industry had ample time to weigh in. It's outrageous that they're now trying to derail the entire process. Failure to adopt these regulations will allow countless environmental problems to remain unchecked and increase the health and financial burdens borne by the public.

Please help Pennsylvania improve environmental protections and industry accountability by voting YES to regulations for both conventional and unconventional operators.

Thank you.

Sincerely,

Lee Bible
