Subject: Support Ch. 78 oil and gas drilling rules

I am writing to urge you to support proposed oil & gas drilling rules known as "Chapter 78." These much-needed safeguards are five years in the making, and are critical to protecting Pennsylvanians' health and environment from the risks of drilling, including hazardous open-air waste pits. Please support and finalize these rules for the sake of Pennsylvania's air, water, and public health. ALLOW me to add , they actually were tracking under me without my knowledge nor permission for 3 years until I found out they asked our neighbor if they could do geo-thermal testing under their home!!! I am about 5 feet from their home & received NO such notice !!! That just shows how untrustworthy they are! Please, please DO NOT allow fracking without TRUE protection & real fines ,in fact make it so there is no NEED for fines ,in other words protect us & our children & their children from disasters & disease's. I'm a voter & will be watching ,I'm tired of not being able to open my window for fresh air & soot & chemicals in the air & water & paying for water just to have to pay for a filter for water I already pay for! Not getting notified for infractions until months later after the fact & I have to watch because of my rare disease ,bacteria normal ppl can handle ,my body can't . I was so sick at Christmas & found out months later about the water infraction with my monthly bill. No one even notified me. Please stop this insanity...Thank you !
