Sent: Friday, April 15, 2016 7:20 PM  
To: IRRC  
Subject: Regulation #7-484, Environmental Performance Standards at Oil and Gas Well Sites

3042

Dear Independent Regulatory Review Commission Members:

For too long, oil and gas operators in Pennsylvania have conducted their activities under outdated regulations and with virtual impunity—factors that have helped spur ever-growing impacts on water, air, and health.

The final draft Chapter 78 and 78a regulations from the Department of Environmental Protection (DEP) represent a significant step forward in aligning the state's oil and gas regulations with new technologies and modern-day practices. Today, both conventional and unconventional operations rely on hydraulic fracturing (fracking), use toxic chemicals and large volumes of water, disturb land, and generate polluting waste.

Both Chapter 78 and Chapter 78a are the result of over three years of public hearings, comment periods, and revisions—during which legislators and the industry had ample time to weigh in. It's outrageous that they're now trying to derail the entire process. Failure to adopt these regulations will allow countless environmental problems to remain unchecked and increase the health and financial burdens borne by the public.

Please help Pennsylvania improve environmental protections and industry accountability by voting YES to regulations for both conventional and unconventional operators.

Thank you.

Sincerely,

Michael Ostrosky  
354 Keystone Drive  
New Kensington, PA 15068

Failure to adopt these regulations will allow countless environmental problems to remain unchecked and increase the health and financial burdens borne by the public.

Please help Pennsylvania improve environmental protections and industry accountability by voting YES to regulations for both conventional and unconventional operators. This is very important to me. As someone who relies on well water, I am deeply concerned with the lack of oversight of fracking. I support a ban on all fracking, but oversight is a minimum requirement. For too long, Pennsylvania has been a wild west where drillers can get away with anything. This needs to be addressed immediately.

Thank you.

Sincerely,
