Harrisburg, PA 17105-8477

Dear Board Members:

I am employed by an oil and gas production company and I am concerned about what will happen to **my job** if these proposed changes in the regulation of our industry are passed. **I am writing to urge you to vote "NO" on the changes to the oil and gas regulations currently before your committee.**

Shallow oil and gas have been produced in our area for over 150 years and has had no lasting detrimental effect on our environment. Putting the company I work for out of business by imposing costly, unnecessary new regulations on them would not only jeopardize **my job** and would also **destroy our local economy**, which has been dependent on oil and gas production since the mid-1800's.

If you think it is necessary to impose new regulations on drillers and operators of deep, nonconventional wells, why weren't the new regulations written for just that purpose? Why were the shallow well drillers and producers included? Why can't they continue to operate under the current regulations, which have done an effective job?

Please vote "NO" to the proposed changes to Chapter 78 regulations so my job, and thousands of other jobs that depend on these producers of shallow oil and gas, is not lost.

Sincerely,
