Subject: Regarding proposed changes to Code 21 -Continuing education and reporting crimes and discipline

Regarding:

Proposed §§ 21.29a, 21.156b and 21.273a -I believe that these proposed changes will help clarify and give clear direction to the nurses in Pennsylvania with regard to reporting expectations in Pennsylvania. As a nurse educator for LPN's, I am responsible for delivery of rules governing professional practice. The importance of reporting crimes and discipline sends a message of accountability for practice and protection of the citizens in Pennsylvania.

§ 21.132(b) regarding the addition of language to further clarify the term units is of great help to those of us who teach and are responsible for reviewing CEU's for our faculty.

The question about unit verses course comes up frequently. Hopefully with the implementation of these changes, this confusion will cease to be an issue.

Thank you for reviewing my comments.
