Regulation No. 7-485 (#3052)
Environmental Quality Board
Additional RACT Requirements for Major
Sources of NOx and VOCs

On April 7, 2014, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Environmental Quality Board (EQB). This rulemaking amends 25 Pa. Code Chapters 121 and 129. The proposed regulation was published in the April 19, 2014 *Pennsylvania Bulletin* with a 72-day public comment period. The final-form regulation was submitted to the Commission on January 14, 2016.

This regulation adds additional Reasonably Available Control Technology requirements and emission limitations for major stationary emission sources.

We have determined this regulation is consistent with the statutory authority of the EQB (35 P.S. § 4005(a)(1)) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

BY ORDER OF THE COMMISSION:

This regulation is approved.

George D. Bedwick, Vice Chairman
