**Subject:** RE: Department of Transportation Proposed Regulation #18-460 (IRRC #3065)  
"Mechanical, Electrical and Electronic Speed-Timing Devices"

Corinne: At the request of David Sanko, I am responding to your email for our position on whether we would have any issues with the Department of Transportation's Proposed Regulation #18-460 (IRRC #3065), "mechanical, Electrical and Electronic Speed-Timing Devices." After reviewing the proposal we have concluded that it does not directly affect our membership. We would argue that it could potentially benefit our members in that by allowing "mobile testing units" townships that need to have their police car's speedometers tested could now have it done on site reducing the potential down time of a vehicle. We would support the change to the regulation as it is being proposed.

We appreciate the opportunity to comment on this regulation. Should you need to discuss it further, please feel free to contact me. Elam
