To The Pa. Board ,

I strongly urge you to NOT limit or eliminate the acces to on-line cont.education credits for re-licensure. The economic costs of attending two day or even one day seminars is a stress to the practice and income. I have found that the convenience of studying 1-2 credits at night or early morning when I'm ready to absorb and enjoy the material is FAR better than the dry, long classroom experience. Additionally I can easily review issues that I'd like to know more deeply.

I see no advantage to eliminating the on-line option, only disadvantages. Serve your DC's , don't make serving others more difficult.

Sincerely,  
Dr. Ben Grisafi
