Subject: RE: PA Environmental Hearing Board - Final Omitted Regulation

Jim: Good morning. We have reviewed the Environmental Hear Board's final omitted regulation #106-11 (IRRC #3073) and concluded that it does not impose any hardships on our membership. Actually, if the proposed changes result in the potential reduction for litigation then this regulation should be adopted.

As always, thank you for seeking our input on the proposed regulation. Look forward to working with you in the future. Elam
