Subject: No. 16A-4713 Licensure Renewel Fee Increase

2015 JUN -5 AM 9: 35

Dear members of the Regulatory Unit Counsel and House Professional Licensure Committee,

I trust that the Counsel and Board members have provided a thorough review of the expenses associated with maintaining, implementing and supporting the State Board for Professional Engineers, Land Surveyors and Geologists for the Commonwealth, its residents and licensures' to reduce and/or eliminate unnecessary, wasteful and/or erroneous costs and spending prior to passing the burden of the deficit costs onto the license holders. Doubling the cost of our licenses seems to be an easy solution to balance the budget. Can the Counsel forward the other cost cutting measures taken to help reduce the budget deficit projection or is the fee increase the only measure taken for balancing the budget?

Regards,

Robert O Taylor, II P.E.
