Subject: Taxi's for Disabled

To all:

As a frequent traveler to Philadelphia over the past 15 years we have wished for a way to travel across the city with our two wheelchair bound daughters. We would also love to be able to send our daughter there to visit friends but, she would have no method of transport within the city that is convenient and would take her to the places where friends like to hang out.

We are thankful to cities like NY and LA where this is standard and available to her and allows for a "normal" opportunity to travel around like everyone else with different abilities.

Please consider this legislation for accessible cabs in Philly. Earn the title of "city of brotherly love" and accommodate others who need the help.

Thank you.
