Subject: Regulation#126-11 Modern Taxicab standards

2015 JUL -1 AM 10: 25

To whom it may concern,

Everyone in my family has a disability and my daughter has a heart condition once I had an emergency with her and they refused to take me in my power chair. As a mom that was terrifying. I have taken rides in cabs all over this country and in England but have been stuck at are airport to many times with no way home. I have been fighting for cabs in Phila for well over fifteen years please lets just get this done.

Many times me and my daughter want to just go out, but no cabs for mom this has got to change are times has come, it is are civil right to have a cab I expected that we would have had them along time ago once the ADA passed and other states started making cabs accessible. For a person with a disability this could make all the difference in going to college or keeping a job. Life should be as easy for us as it is for everyone else. I support regulation#126-11 we will ride! Please help free disabled people go where everyone else has already been.

Respectfully Cassie James Holdsworth
