Subject: vaccines

Dear Ms. Moichanow,
Exec. Director Dept of Education

Please accept this email as my official notification for the proposed immunization to 28 Pa Code ch 23:

#3147 Pa Department of Health
#3146 Pa Department of Education
My concerns are many.
These are just a few:

The shows in Question 10 that herd immunity is needed to protect those who cannot be vaccinated.
This concept is flawed, Many outbreaks have and still happen in fully vaccinated children.

The Department is also recommending a Meningitis Vaccine for 12th grade students, as this disease is considered a rare disease as per (the Pa Dept of Health) the state has only had less than 20 cases in recent years. It will cost over \$15million to vaccinate all of these students. I just don't see the logic in this whatsoever! Needless to say the risks involved as stated in the CDC Pink Book.

Im asking the department to reconsider the proposed changes.

Sincerely,
Anita Brown, Grandmother to 4 children
