Subject: Immunization regulation changes

Dear IRRC,

I am emailing you because you have membership on the Health Committee, and I am extremely concerned about the immunization regulation changes by the Department of Health. Please do not approve these changes!

The Department of Health failed to honor the many people who left comments about their opposition to the absurd change of the provisional period from 8 months to 5 days.

They also failed to address many other concerns such as the high cost of a meningitis mandate. Currently, 7th grade is the last reporting point for student vaccinations. Adding this vaccine to 12th graders will create a third reporting burden, consuming more staff hours and requiring more paperwork associated with the provisional timeline, filing of waivers, and individual follow-ups.

The Department of Health needs to understand the people who will be affected by this change, and I am asking you as our elected official to please call for a review or disapproval of these changes!

And thank you again for helping to preserve medical freedom in PA!!

Sincerely,

Terri N
Allegheny County, PA
