**Subject:** Proposed immunization regulations

2016 APR 22 AM 11: 33

Ms Findley,

I am fully in favor of the change in the immunization regulations. However, making a mandatory change in the summer, just prior to the 2016-2017 school year, will make it very difficult for the CSN to contact the parent in such a short time frame. In addition, the family physician and pediatrician offices will not be able to accommodate all of the children that will need their boosters, and, as a result, I am afraid that students will be excluded to no fault of their own.

Is it possible, for the next school year only, to set a time frame of January 1, 2017, to have all children immunized? Then, the following school year set the time frame into motion.

Karen Truesdale, RN, MSN, CSN  
Certified School Nurse.
