Subject: provisional immunization

2016 APR 22 AM 11:35

Hi

I'm writing to make a comment about the proposed changes. If first time doses of Tdap and MCV are going to be required for 7th grade without a provisional enrollment period, I think it should be written as a requirement by say May 1st of 6th grade. It would be much easier to encourage parents to get it done with the 6th grade physical and we'd have more time to work on contacting parents and excluding students if need be. The beginning of the school year is far too busy to be going through potentially a large number of immunization records and excluding students by the first day of school. That would be a disaster for school nurses.

Thanks for considering!
