**Subject:** Proposed immunization regulations

2016 APR 22 AM 11: 33

Hello,

As a school nurse in charge of a middle school I implore you to change the regulations to dispose of the provisional period. Many parents wait until the very last minute to get these immunizations exposing their children to possibly deadly diseases. We have several children each year who go beyond the 8 month provisional period because they have called in and state they have appointments for their children after the 8 month mark. They have been sent many reminders still have not taken their children for these state mandated immunizations.

This would require additional end of the year groundwork for 6th graders but would save an immense amount of time, paperwork, and money for the future. This would amount to great monetary savings of postage and paper for 7th grade students.

Thank you for your time!

Valerie Fulton
