Subject: immunizations

2016 APR 28 AM 10:31

I am writing concerning the proposed changes to the provisional period for immunizations. I work as a school health aide at Saltsburg Elementary along with Patty Prenni. I feel that the 5 day provisional period would be very difficult to manage at the beginning of the school year. The first few days are busy collecting emergency cards, writing health plans, making sure students who need medications have the paperwork and medications here. There can be a lot involved in tracking down students and parents and determining how to deal with health conditions. It is an incredibly busy time of the school year. I feel we would either need to have no provisional period, or at least extend it to 60-90 days. I wanted to respond to give my opinion, thank you.
