Subject: Proposed immunization changes

2016 APR 29 AM 9: 58

Dear Cynthia,

As a school nurse at a middle school including 7th grade, I think changing the immunization provisional time frame is a good idea. The previous time of 8 months is too long to have these students in school. But I think the change to 5 days is too short to be feasible for the schools to determine the students this involves. Many student papers come in during the summer months for new students, requests for student records on student who have moved away, medication forms from parents and doctors, dental reports, as well as doctor physical reports including immunizations. At the beginning of the year We nurses are meeting with students and parents to set up a school plan for students with a variety of health needs from life threatening food allergies, seizure action plans, access to school because of physical challenges and so on.

Only having 5 days to review all this incoming info will be very challenging . I think a 30 day provisional period will be more manageable.

Thank you.

Beverly Moyer, RN, CSN, MSN
