**Subject:** Immunization proposal

2016 APR 29 AM 9:59

I would like to voice my displeasure at the new immunization proposal to change the provisional enrollment from 8 months to 5 days. This change in the requirement does not give the school nurse ample time prior to the 5 days to properly assess all the immunizations of the children, notify parents of the lack of immunizations either in writing or by phone or giving the parents the necessary time to plan and receive these immunizations. In addition, this does not account for the proper spacing of immunizations of those children who received their immunizations later than recommended. It does seem that the 8 month grace period is longer than necessary but the 5 days is not sufficient. I would recommend a longer period such as 60 days. This will allow the proper notification as well as the time needed for the immunization. Thank you, Brenda Haberle RN CSN
