Subject: Vaccinations

I am vehemently opposed to mandatory vaccinations . My sister and daughter both nearly died from pertussis vaccination. I believe strongly the science based evidence that childhood illnesses build our immune systems. Carefully chosen voluntary vaccination is fine but mandatory is a violation of personal rights in many ways.

In these times of sinister profits being made by the likes of Dick Cheney and others, who buy up patents on vaccinations prior to ramping up general hysteria about Zika virus, Flu etc, it is imperative that we do not allow government control of what really boils down to protecting our immune systems from the hubris of scientists and their financial partners.

Thank you ,

Lisa Brinton
