Subject: regarding proposal IRRC #3147, which makes changes to title 28, chapter 23 of the Pennsylvania Code.

2016 MAY -5 PM 3:11

To Whom it may concern,

I have become aware of the proposal IRRC #3147, which makes changes to title 28, chapter 23 of the Pennsylvania Code and am concerned about the parts dealing with the change to the provisional period for school-age children who have not received all required vaccines being reduced from 8 months to 5 days. How is this enough time to give a child all the vaccines needed, let alone multiple dose of the same vaccine. No one should be forced to give their child that many vaccines at once. This proposed policy goes to far and does not allow for a reasonable time frame for vaccines to be given. Furthermore, the part of the proposal that requires a professional statement that a child has had chicken pox is unnecessary and does not allow for the child who never went to a doctor when they had chicken pox. Please reconsider the undue pressure of these issues.

Thank you,
Karie T. Ardelean
