May 5, 2016

### Proposed Regulatory Changes by Pennsylvania Departments of Health and Education:

We oppose the proposed changes because the result will make a bad situation worse. The current regulations are already causing significant and permanent damage to children's health in Pennsylvania. We not only oppose the changes, but we support banning vaccines altogether.

### Ten Reasons To Ban Vaccines, Not Mandate Them:

**Summary:** Common sense dictates that mass medication is an open door to mass contamination. Ethically, government-mandated vaccinations are a violation of basic human rights to good health, The Precautionary Principal, and the Hippocratic Oath of physicians to First, Do No Harm. Vaccines have been proven to be catastrophically unsafe, spreading the very diseases they were claimed to cure. Vaccines contain numerous toxic ingredients that have permanently injured and killed untold numbers of people and unborn babies. It rises to the level of a criminal conspiracy that the federal government has shielded the vaccine industry from effective oversight and any liability. Horrific scandals continue to emerge, that the public has been willfully misled about vaccine 'safety and effectiveness' as succeeding generations continue to suffer permanent injury and death. In this decades-long battle for the truth, we state, "Vaccines should not be mandated, vaccines should be banned."

#### 1. Vaccines cause catastrophic and permanent damage and death:

**"Total compensation paid (from The Vaccine Court) over the life of the program (VAERS) is approximately \$3.3 Billion."** From the U.S. Centers for Disease Control (CDC), The Vaccine Adverse Event Reporting System (VAERS):

*"Since 1988, over 16,878 petitions have been filed with the VICP. Over that 27 year time period, 14,497 petitions have been adjudicated, with 4,582 of those determined to be compensable, while 9,915 were dismissed."*

<http://www.cdc.gov/vaccinesafety/ensuringsafety/monitoring/vaers/index.html>

Health Impact News: *"As in previous reports, the June 15, 2014, report covering a 3-month period shows that the flu vaccine is the most dangerous vaccine in America. 78 cases were awarded settlements for vaccine injuries, with 55 of the settlements being for the flu shot, including one death. Most of the settlements for injuries due to the flu shot were for Guillain-Barré Syndrome. Other flu vaccine injuries included: Chronic Inflammatory Demyelinating Polyneuropathy, Rheumatoid arthritis, Shingles, Brachial plexus neuropathy, Bell's Palsy, Brachial neuritis, Transverse myelitis, Lichenoid drug eruption, and Narcolepsy."* See gov't chart at: <http://healthimpactnews.com/2014/government-pays-damages-to-vaccine-victims-flu-shot-most-dangerous-with-gbs-and-death-settlements/>

#### 2. Massive "underreporting" in a government-operated "passive reporting system" of adverse reactions from vaccinations:

**U.S. Dept. of Health & Human Services (HHS) admission of systemic under-reporting problems:** VAERS is a **passive reporting system**, meaning that reports about adverse events are not automatically collected, but require a report to be filed to VAERS. VAERS reports can be submitted voluntarily by anyone, including healthcare providers, patients, or family members. Reports vary in quality and completeness. They often lack details and sometimes can have information that contains errors. **"Underreporting" is one of the main limitations of passive surveillance systems, including VAERS.** The term, underreporting refers to the fact that VAERS receives reports for only a small fraction of actual adverse events.

**National Vaccine Information Center:** *"Although this law requires doctors and other vaccine providers to report hospitalizations, injuries, deaths and serious health problems following vaccination to VAERS, it is estimated that less than 10 percent of all vaccine-related health problems are ever reported to VAERS."* <http://www.nvic.org/reportreaction.aspx>

3. **HHS promotes the "Coincidence Myth" of SIDS and other adverse health effects of vaccines:** "More than 10 million vaccines per year are given to children less than 1 year old, usually between 2 and 6 months of age. At this age, infants are at greatest risk for certain medical adverse events, including high fevers, seizures, and sudden infant death syndrome (SIDS). **Some infants will experience these medical events shortly after a vaccination by coincidence.**" <https://vaers.hhs.gov/data/index>

(1)

4. **Vaccines contain numerous toxic ingredients** that can cause permanent damage to the body and brain, including death, as published in the following government and industry documents:

- Vaccine Ingredients: <http://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/B/excipient-table-2.pdf>
- The Vaccine Injury Table: <http://www.hrsa.gov/vaccinecompensation/vaccineinjurytable.pdf>
- Vaccine Product Inserts and Information: <http://www.fda.gov/BiologicsBloodVaccines/Vaccines/ApprovedProducts/ucm093830.htm>

**Highly toxic Mercury preservative remains in Flu vaccines, including non-mercury flu shots:**

- "Mercury is a highly toxic element; there is **no known safe level of exposure.**" <http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3096006>
- **CDC's contradictory Flu Vaccine guidelines for infants under 6 month VS unborn babies! The CDC cautions against giving infants under 6 months the flu vaccine, while encouraging pregnant women to get a flu shot!** Again, flu vaccines include mercury – for which there is no known safe level of exposure. Source: <http://www.cdc.gov/flu/protect/whoshouldvax.htm#flu-shot>
- "You can (try to) choose a "non-mercury flu shot," meaning a flu shot from single-dose vials or pre-filled syringes where the preservative is not needed, but that is no guarantee that mercury is not present. Minutes from a government meeting on vaccines reveals that even in these single dose flu vaccines sometimes "thimerosal is present in trace amounts as a result of the manufacturing process."" <http://healthimpactnews.com/2014/government-pays-damages-to-vaccine-victims-flu-shot-most-dangerous-with-gbs-and-death-settlements>
- **Mercury was replaced by aluminum, which some consider even more toxic than mercury.** See: <https://vactruth.com/2012/01/02/aluminum-fda-got-it-all-wrong/>

5. **Vaccines spread disease.** The vaccinated population actually threatens the unvaccinated population by spreading (or shedding) the disease. "Herd Immunity" is a shocking reversal of the truth by the vaccine industry, who are spreading this fiction in order to confuse the issue, deny responsibility for spreading diseases, and target those who refuse to be vaccinated:
- a. Vaccine Shedding: <http://www.nvic.org/CMSTemplates/NVIC/pdf/Live-Virus-Vaccines-and-Vaccine-Shedding.pdf>
  - b. Flu Shots Increase the Flu: <http://articles.mercola.com/sites/articles/archive/2012/01/03/flu-shot-increase-flu.aspx>
  - c. Myth of Herd Immunity: <http://www.stopmandatoryvaccination.com/public-health/myth-4-herd-immunity/>
6. **There is no effective U.S. federal oversight of vaccine studies, of vaccines' safety or effectiveness, nor the actual number of people who have been harmed.** The Federal government has created a "passive system" (VAERS) which relies on reports from the industry, medical professionals, and victims, but does not check the accuracy of the reporting system: The Vaccine Adverse Event Reporting System – <http://www.cdc.gov/vaccinesafety/ensuringsafety/monitoring/vaers/index.html>.
7. **There is no effective U.S. federal oversight of manufacturers' facilities, including foreign manufacturers in China and India - who produce most vaccines & medicines.** "...be they prescription drugs or biological drugs such as vaccines—made in China and used in the U.S. are, for all practical purposes, not being inspected by the main U.S. regulatory agency charged with protecting the health of the American consumer." <https://www.thevaccinereaction.org/2016/04/should-we-be-concerned-about-vaccines-made-in-china/>
8. **Government institutions are protecting the "Vaccine Industry" from liability and lawsuits, and not protecting the public health.** If vaccines are stated to be "extraordinarily safe" by a major vaccine proponent physician, why are they shielded by Congress and the U.S. Supreme Court from pharmaceutical corporation product liability and physician malpractice lawsuits when vaccinations cause the injury or death of an individual?

**"The Vaccine Industry was going out of business due to lawsuits from vaccination victims until Congress came to its rescue in 1986."** See <http://www.globalresearch.ca/vaccines-threads-of-corruption/5499738>.

In 1986 the U.S. Congress passed the National Childhood Vaccine Injury Act (PL99-660), which created The "National Vaccine Injury Compensation Program" (<http://www.hrsa.gov/vaccinecompensation>) and the "Vaccine Court" <http://www.uscfc.uscourts.gov/vaccine-programoffice-special-masters>.

**The Vaccine Court puts the burden on victims to prove harm, rather than require the vaccine manufacturers to prove safety.** Despite these and other severely onerous requirements, victims have been awarded \$3.3 billion dollars since 1986. <http://www.cdc.gov/vaccinesafety/ensuringsafety/monitoring/vaers/index.html>.

It should be noted, the 1986 law allowed vaccine injury victims to sue vaccine manufacturers when they received no compensation. Although, if the vaccine injury is not on the approved schedule it is hard to receive compensation. **However, in a 2011 Supreme Court case, all access to the courts was shut off.** (*Russell Bruesewitz et al v. Wyeth et al.* No. 09-152)

(2)

9. **The history of The Vaccine Fraud is the all-too-familiar history of collusion between government and business:**

- a. <http://healthimpactnews.com/2014/vaccine-scandals-and-criminal-cases-increase-in-2014/>
- b. <http://articles.mercola.com/sites/articles/archive/2015/01/18/history-vaccination.aspx>
- c. <http://www.vaccinationcouncil.org/2011/11/17/smoke-mirrors-and-the-disappearance-of-polio/>

10. **Vaccinations are a violation of "The Precautionary Principle" and Hippocratic Oath "First, Do No Harm"** as evidenced by the aforementioned information (page 2 of this document), which includes: The Vaccine Court's \$3.3 billion compensation to victims to date, plus government and manufacturers' documents, including: The Vaccine Injury Table, Vaccine Ingredients, Vaccine Inserts, etc.

**Hippocratic Oath, First, Do No Harm:** *"Hippocrates is often called the father of medicine in Western culture. The original (Hippocratic) oath was written in Ionic Greek, in the late Fifth Century BC. It is usually included in the Hippocratic Corpus. Strictly speaking, the phrase does not appear in the oath, although the oath does contain "Also I will, according to my ability and judgment, prescribe a regimen for the health of the sick; but I will utterly reject harm and mischief", in Latin "Victus quoque rationem ad aegrotantium salutem pro facultate, judicioque meo adhibebo, noxamvero et maleficium propulsabo".* [https://en.wikipedia.org/wiki/Hippocratic\\_Oath#22First\\_do\\_no\\_harm.22](https://en.wikipedia.org/wiki/Hippocratic_Oath#22First_do_no_harm.22)

**The Precautionary Principal:** *"The precautionary principle (or precautionary approach) to risk management states that if an action or policy has a suspected risk of causing harm to the public, or to the environment, in the absence of scientific consensus (that the action or policy is not harmful), the burden of proof that it is not harmful falls on those taking an action that may or may not be a risk. The principle is used by policy makers to justify discretionary decisions in situations where there is the possibility of harm from making a certain decision (e.g. taking a particular course of action) when extensive scientific knowledge on the matter is lacking. The principle implies that there is a social responsibility to protect the public from exposure to harm, when scientific investigation has found a plausible risk. These protections can be relaxed only if further scientific findings emerge that provide sound evidence that no harm will result. In some legal systems, as in Law of the European Union, the application of the Precautionary Principle has been made a statutory requirement in some areas of law. Regarding international conduct, the first endorsement of the principle was in 1982 when the World Charter for Nature was adopted by the United Nations General Assembly, while its first international implementation was in 1987 through the Montreal Protocol. Soon after, the Principle integrated with many other legally binding international treaties such as the Rio Declaration and Kyoto Protocol."* [https://en.wikipedia.org/wiki/Precautionary\\_principle](https://en.wikipedia.org/wiki/Precautionary_principle)

**The medical profession's reputation is already in shambles**, as "preventable medical errors" are the 3<sup>rd</sup> leading cause of death in the U.S., claiming the lives of approximately 400,000 patients each year. Their general support for vaccination will worsen these statistics and justifiably destroy the public's trust.
