**Subject:** new changes on immunization requirements

2016 MAY -5 AM 9:02

Greetings!

After recently learning of the proposed changes to the school vaccination regulations, I wanted to express my both shock and outrage that the amount of time allotted to "catch up" on vaccinations would be condensed to *five days* rather than the current 8 months. We are friends with a family whose son had a severe reaction to his vaccinations when they administered a bunch at once in order to be caught up with the normal schedule. There are many risks possible with such a short time schedule, and it leaves not flexibility for the parents and doctors to make reasonable judgements. Please DO NOT shorten this time requirement.

Thank you for your consideration!!

Rebekka Parry
