Subject: New vaccine regs for schools

Good morning!

I want to thank you and your department for introducing this and getting it signed into action.

I am currently employed as a school nurse and I work for a primary care provider, so I get to see both sides of the coin and it really allows me to appreciate this effort even more. I worked as a community health nurse for the state of PA for quite a few years and I know from experience how many hours are poured into the vaccine preventables and the outbreaks. It is still exciting for me to see changes like this that are a huge positive for public health! (On a side note, public health is my first love and I cannot wait to get back to it – I was part of the northwest and southwest team!!!)

Thanks for all you do!

Kristin
