**Subject:** vaccine changes

2016 MAY -9 PM 12: 40

Please continue to allow parents the right to refuse vaccinations for their children. Although vaccines are important, there are many serious risks and side effects that can and do happen as a result of vaccinations. Parents have the right to choose if these risks outweigh the benefits.

I oppose the addition of another meningococcal vaccine for students entering 12th grade. I oppose the inclusion of pertussis vaccine for kindergarten admission.

Thank you,  
Sue Stracciolin
