**Subject:** Wage Rules

To Whom it may concern,

The state of Pa. has no business in further regulating overtime, changes in exempt status, and additional interference with private employers setting compensation for its employees.

We have recently seen what excessive regulation does to the economic well-being of private industry. It creates a drag on economic growth and ultimately not only hurts employers, but workers as well.

The state should be focused on rolling back regulations, not adding to them!

Thank you.
