I am totally against the proposed licensure rate increases. As a massage therapist for 23 years, who is already struggling due to a poor economy, and a saturated market, the last thing my business needs is my license fee to more than double.

If the state wants small businesses to survive, raising rates on an already tough market will only cause many of us to fold. Is that what you want?

Find another way to increase revenue other than penalizing the hard working, dedicated massage therapists of this state.

Thank you.
