Why are there considerations to raise the fees? Where are the funds going and for what?

Its expensive as is to keep your license. Therapists are leaving their careers because we cant make ends meet with what we have NOW. How does this make any sense? Our work is being devalued by big corporations, Groupon and Chinese establishments yet you want to RAISE OUR FEES?.

New therapist makes as little as \$12.00/hr before tax.

Unless this money will go back into massage therapy field to secure and improve our industry please STOP making things harder for us and our families that we BARELY able to support.
