To whom it may concern,

I am a massage therapist for 18 years now. The fees you are charging are outrageous. How much do you think we make almost nothing. We do this so people in pain can get relief so they don't have to pop another pill. We get no sick pay or holiday pay or vacation pay we don't get any insurance or disability. How much blood can you get from a stone?? We fall under nursing and they are not being asked to pay more and they make much more money and receive all benefits. Why are you picking on people that have nothing and give so much?? I am sure you are getting paid well and have all the perks you need to be happy!! Please reconsider what you are asking from us. By the time all is said and done it will cost us about 1000.00 to get our license renewed with all the classes and fees that is a lot when you work 3 jobs and still make welfare money!!!
