**Subject:** New fee proposal  
**Date:** Monday, July 2, 2018 7:19:44 PM

---

Your new fees proposed are ridiculous

- 1) These higher fees are not just a small jump but are you just jump in price
- 2) This comes at a time when massage therapy is at an all time low in terms of how much money and average massage therapist can actually make in a realistic, average career setting
- 3) The price per hour but the average massage therapist used to be able to get years ago is less than half that price now so as a career ones hourly earnings has gone down quite a bit yet fees are going up up up
- 4) continuing Ed requirements make an additional burden

Please seriously consider not raising the rates

I was never for having a state board for massage therapy and I don't see any benefit that it's had for me

It's been nothing but a burden and out with these new fees you're proposing it's even more of a burden

What is being offered to us that is the added value for this raise in price? Nothing
