Subject: No fee increase
Date: Thursday, July 12, 2018 9:47:00 AM

To whom it concern:

Please do not increase the fee, as a business owner I find it hard enough for my clients to afford massage. Unfortunately Pennsylvania is not one of those blessed states that have a lot of industry. Most people live pay check to pay check and when life pops up with unexpected expenses, what are you going to do? Not pay a bill to get a massage.....that's not realistic. The more the general public get taxed the harder it is for people to find the funds for "life's little extras" the out come of this service providing business suffer.

As an industry massage therapist work together to try to educate our clients that massage isn't just a luxury but a holistic means for personal health care.

By not increase fee's it helps massage therapist keep the cost of services down. This allows massage therapist to feel more finically affordable and we can help more people get holistic medical benefits without having to feel like massage is a luxury.

Why take a pill? When you can get a massage.

Thank you

Katy Lee
