After sitting down and reading about this increase these are unbelievable. As a therapist not only do we pay to renew we pay insurance C.E.U.s and student loans . As a mother and main provider we barely make it as it is. This increase isn't fair what so ever . When most of the time you wait months to even get your license to begin with. We are here to help people and with that increase you our robbing people of that because some of us won't be able to budget that in and give it up all together. Let's hurt the people that are working because once they cant any more that means more people on welfare so I guess which one matters more to you. People working or people feeding off the government.
