I would like to address the proposal of the price hike on renewing my licence.

I could clearly understand if the price would go up some but this increase "Hike" is robbing us. Most massage practioners, "new practioners" are coming fresh out of school. The struggle of paying for school then the preposed "Hike", there will be no more practioners. Others are in low income massage Spa's ex (Hand & Stone) the people that open these "Spa's" have never practiced with in our scope. We are not being properly compensated for what we do and are forced to work more hours or seek another job so we can work in our practice we love. This is an out rage.

I have been in the practice of Massage for 26 yrs. This preposed "Hike" is by far the biggest disapointment along side these new Franchises.

What should increase is respect in our practice. What should change is that we can clame all of what we put in to keep our licences. Mandated reporter, CPR, insurence, local tax, CEU'S (classes price's range just as much as the preposed "Hike" or more) last put least licence. All of this we cannot claim in our taxes. Is not fair! This should change. We need to have our dues compensated and there not.

The other issue is if there is a descrepence and we call Harrisburg there is ether no one that answers or they dont know what we are talking about. That needs to change. Again respect is due to our practice. Reconsider this "Hike".

Respectfully,
Roselin Morales
