---

I think it is outrageous to increase the licensing to the amount of \$100 and \$200. I know nurses who are required to do less with renewing their licensing then massage therapists and they are working with life and death situations. You are making it a hardship for people who are trying to make a living from being a massage therapist, first with the requirements of the number of CEU's and mandatory hands on programs that we have to pay for and take time off of work to accomplish and now the increase in licensing fees. You are going overboard with these requirements for massage therapists and creating undue hardships. I question your judgement and the negative impact you are creating for massage professionals.
