I don't think there is a need to increase the massage renewal fee from 75.00 to 200.00 that is ridiculous. We are paying for continuing ED every two years that can range up to 300.00 to 700.00 dollars and now you want to increase the renewal fee. if you are having problems with people not having a license and practicing than there is a need for investigating. That is something the PA state needs to do not increase our renewal fee. I have been practicing for 12 years and followed all the rules on keeping my license going which on my budget is very hard to do something you enjoy and have to pay this amount of money. I'm voting NO for the increase!!! You people need to get your money somewhere else and not the hard working massage therapists. This is very unfair. I don't know if this will make a difference or not but that is my opinion we are making a living making people feel good should there be a price on that! Thank You
