Hello,

I am against the fee increase for Massage Therapists. I am currently maintaining my license, but not practicing full time. It is already very costly to take continuing education classes. I think a lot of therapist will be discouraged with the fee increase and will quit or practice without a license. Massage therapists do not make a lot of money as it is, and it is an extremely physically demanding profession. I have a question... does the person/people who decided to try to increase the fee- are they Massage Therapists?

Thanks
