Please reconsider regulation number #16A-724. These raises in fees are unacceptable.

Consider however, spending within the means of what the business allows without going into debt. Stop all unnecessary spending and use the fees that you get at this time to continue your services.

Many of us do not do enough massage to make it worth the money that is spent each year to keep our licenses as it is.

We seriously need to not spend money that we do not have.

The past mistakes of overspending must cease, this is not our overspending, and there is no reason that we should have to pay for the continuation of overspending on the part of those who make these decisions.

Thank you for your time,
Samira Muhammad
