To whom it may concern;

It is my understanding that the reason the fee is going to be increased is due to the fact that the regulatory counsel is not financially supportive. I think it would be helpful to show the expenditures of the licensing board vs the income that is brought in by the fees. Instead of increasing licensing fees, has there been an attempt to decrease expenditures? Has there been a discussion if Pennsylvania needs a licensing board?

Increasing the licensing fee by over 2 1/2 times its current rate seems extreme.
