I personally feel if we are going to be subjected to having video monitors then we should at least be reimbursed for the price of these expensive monitors. A lot of us will not be able to afford to go out and purchase these. Also the costs of having to do extra trainings, which aren't cheap, should also be reimbursed or at least half. These costs can all add up to be a burden on the childcare provider. I realize this is all for the children, but the department also needs to understand that we need help and support, as well, so that all these new requests will be obtainable, if they go through.
